DETAILED ACTION

1. Applicant's arguments filed 10/24/2007, with respect to Herkstoeter et al and Wittmershaus et al have been fully considered and are persuasive. The 103 rejection has been withdrawn.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 32-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wittmershaus et al (Journal of Fluorescence, Vol. No. 2 June 2001, pages 119-128) in view of Shiba (Chem. Abstracts 1989:31446; abstract of JP 63104050).

The instant claimed invention is directed to microsphere compositions comprising compound of generic formula I or I as shown in claims 32-33. The compounds a formula I and II are dyes. The prior art of Wittmershaus et al discloses the use of dyes in microsphere compositions. Wittmershaus states that ***"Small microspheres doped with organic dyes are of interest for their lasing properties and for their diverse commercial application as fluorescent probes"***.

The prior art of Shiba teaches the following compounds are an organic dye.

PAGE 1-A

PAGE 1-B

This the same dye exemplified in the instant specification. It would have been obvious at the time that applicants invention was made to have used the dye disclosed in Shiba in microsphere composition with a reasonable expectation that said composition would be useful as a fluorescent probe.

The instant claimed invention is obvious because it has been held that "When there is a design need or market pressure to solve a problem and there are a finite number of identified, predictable solution, a person of ordinary skill in the art has good reason to pursue the know options within his or her technical grasp" (SUPREME COURT OF THE UNITED STATESS, KSR INTERNATIONAL CO. v. TELEFLEX INC. et al, April 30, 2007; 550 U.S. 2007).
